

ErgoFLIGHT Specs (EF-KT-Flight

Product Number

EF-KT-FLIGHT

The ErgoFlight™ keyboard tray has been designed for maximum mousing capabilities. The mouse “floats” on its own 9” platform, and may be positioned on either the left or right side of the keyboard tray. Moreover, its flexibility continues as it may be locked into any point along its 7” channel. Then, fine tune its location either above, below or even with the keyboard tray. Lastly, you may adjust its angle and rotation.

The ErgoFlight keyboarding surface is 18 ¾” wide and 11” at its deepest point. Keyboard skids and an antimicrobial wrist pads (removable for curved keyboards) are included.

The ErgoFlight will fit onto any ErgoFusion keyboard mechanism (arm). This is, by far, our most ergonomically adjustable keyboard tray.
