

ErgoFLUENT Specs

Product Number

EF-KT-FLUENT

The versatile ErgoFluent™ keyboard tray can be used as a keyboard tray only, right or left hand mouse or both at the same time. Both wings have integral “mouse traps” to retain mouse in a negative tilt application. Mouse area does not move laterally (“creep away”) when the user mouses or writes. The ErgoFluent™ has mouse capability on the left or right.

The ErgoFluent keyboarding surface expands from its 19” tray surface to a total width capability of 37”. The two independent wings are 8.5” width and extend from beneath the tray. An antimicrobial wristrest is included.

The ErgoFluent will fit onto any ErgoFusion keyboard mechanism (arm).

MODEL	LENGTH	WIDTH	THICKNESS	COLOR	MATERIAL
